

THE MANY HEALTHY ADVANTAGES OF DA VINCI SURGERIES.

The da Vinci Surgical System can offer multiple advantages over traditional open surgery, including:

- Small incisions
- Less pain
- Less blood loss
- Minimal scarring
- Fewer complications, including less risk of infection
- Quicker recovery times and return to normal activities
- Better outcomes and increased patient satisfaction
(in many cases)

(Benefits are not guaranteed. Outcomes vary for each individual patient and procedure.)

PHYSICIANS TO 
Women INC.

A MINIMALLY-INVASIVE SOLUTION FOR COMPLEX SURGICAL PROCEDURES.

The da Vinci Surgical System is one of the least invasive and most effective surgical treatment options available today. It's breakthrough surgical technology that puts unprecedented control and precision in the hands of skilled surgeons.

With da Vinci, surgeons can perform a wide range of complex surgical procedures by making tiny incisions - just 1 to 2 centimeters (less than an inch). Aided by magnified, high-resolution 3D images of the surgical area, surgeons' hand, wrist and finger movements are translated into precise movements of the system's miniaturized instruments.

The da Vinci Surgical System is not a robotic substitute for a surgeon. It cannot be programmed. Just as with traditional surgery and surgical tools, the system can only respond to the direct, real-time input of a surgeon.

SKILLED GYNECOLOGY SURGERY – WITHOUT A LENGTHY HOSPITAL STAY.

The most experienced Obstetrics and Gynecology practice in Southwest Virginia, Physicians To Women has performed more than 200 gynecological procedures using the da Vinci Surgical System.

Hysterectomy, myomectomy and sacrocolpopexy are available to our patients here in Roanoke. You experience all the benefits of da Vinci technology and our skilled surgeons with the added comfort and convenience of being right here at home.

The da Vinci Surgical System is FDA-approved for procedures used in hundreds of worldwide locations.

INSURANCE COVERAGE.

In general, insurance plans that cover minimally-invasive surgery also cover procedures using the da Vinci Surgical System. Of course, coverage depends on the specific plan and its benefits package. To learn more, check with your insurance provider.

Monday through Friday (except major holidays)

Call 540.982.8881 to make an appointment.

Hysterectomy is the second most common surgery among women in the United States. Many women also require other gynecological procedures. While medically necessary, gynecology surgery can be a major life disruption. Women often face lengthy hospital stays, open surgery, significant abdominal pain, ugly scars and long recovery periods.

But now, thanks to breakthrough technology and the skilled doctors at Physicians To Women, gynecology surgery can be an entirely different experience. It's an office visit, a tiny incision, significantly less pain, a better outcome (in many cases) and a faster recovery time.

In increasing numbers, women are having and recovering from, gynecology surgery with greater ease, speed and satisfaction.
